Summary

Backend Engineer with 5+ years of experience developing high-performance systems using Java, Spring Boot, and microservices. Focused on writing clean, efficient code, improving system reliability, and optimizing APIs for scalability and low latency.

Experience

Stashfin Pvt. Ltd., Software Developer Engineer - II | Gurgaon, India

Mar 2025 - Present

- Maintained payment systems for post-disbursement flows (UPI, eNACH mandates, repayments) using **Java**, **SQS**, and **MySQL**, ensuring high accuracy, fault tolerance, and audit readiness.
- Resolved complex production issues in distributed payment microservices using **Redis** and structured logging, reducing transaction failure rates and improving system reliability.
- Built secure REST APIs using JWT-based authentication to manage internal workflows and inter-service communication.
- Engineered internal tools and admin dashboards in **Django**, integrated with **MySQL**, to streamline audit, compliance checks, and monitoring of lending transactions.
- Used **Jenkins**, **Docker**, and CI/CD pipelines for containerized deployments and release automation.

Yatra Freight (Nimap Infotech Pvt. Ltd.), Software Developer | Gurgaon, India

Feb 2024 - Feb 2025

- Built backend services using NestJS and MySQL to automate lane creation and award workflows, reducing manual effort and achieving 30% faster response times.
- Used **Kafka** and **Redis** for asynchronous job queues and caching, improving throughput and system resilience.
- Wrote complex SQL queries using joins and CTEs, and developed NoSQL aggregation pipelines.
- Streamlined vendor rate submissions through a Next.js-based bidding interface with **Redux**, reducing processing time by 20% and improving compliance by 15%.
- Tested APIs via Swagger and Postman; deployed microservices with Docker in a CI/CD workflow.

Antino Labs Pvt. Ltd., Software Developer | Gurgaon, India

Oct 2022 - Jan 2024

- Optimized code performance with advanced MongoDB aggregates, resulting in 40% faster query responses and improved backend efficiency.
- Integrated payment gateways (**Razorpay**, **PhonePe**, **Instamojo**, **Stripe**) using Node.js, increasing successful transaction rates by 40%.
- Added support for scheduling, communications, and document generation using Cron, Twilio, SendGrid, Google Calendar API, and LaTeX-based PDF outputs.
- Implemented secure and scalable REST APIs with proper JWT authentication, tested using Postman.

Infosys Pvt. Ltd., Senior System Engineer | Bengaluru, India

Nov 2020 - Sep 2022

- Improved performance of analytical queries by 20% through indexing strategies in **MySQL** and **Apache Druid**, enabling real-time dashboards and insights.
- Designed and deployed a **Kafka** streaming pipeline to process 14–15 million messages per hour, enhancing data quality and timeliness by 50%.
- Optimized network throughput in SVLAN and CVLAN configurations using protocol-driven logic and performance benchmarking.
- Contributed to internal tooling and automation pipelines using **Jenkins** and version control via **Git**, supporting agile delivery cycles.

Skills

Languages:	Proficient in Java (Primary), JavaScript, SQL; Familiar with C++, Python, PHP, Go, TypeScript
Frameworks:	Strong in Spring Boot and Node.js; Familiar with NestJS, React, and Next.js
Databases:	MySQL, MongoDB; Familiar with KSQL and Apache Druid
Tech Tools:	Kafka, Redis, Jenkins, Docker, Kubernetes, Postman, Swagger, Git, Jira
Core:	Microservices Architecture, RESTful API Design, Design Patterns, OOP, SOLID Principles, Data Structures & Algorithms
Security:	OAuth 2.0, JWT
Cloud:	AWS (Lambda, DynamoDB)

Education

8.02 GPA BTech | Computer Science and Engineering, Galgotias College | Greater Noida, India

2016–2020

89% Senior Secondary Schooling, Kendriya Vidyalaya | Jalandhar, Adampur, India

2014–2015

10 CGPA Secondary Schooling, Kendriya Vidyalaya | Jalandhar, Adampur, India

2012–2013
